EXERCISE
Create a personal website of yours
Breakdown of the requirements for creating a personal website with HTML and CSS:

1. Header:
 - Include a header section at the top of the webpage.
 - It should contain your name or the name of the website.
 - Optionally, you can include a short tagline or description.

2. Navigation Menu:
 - Create a navigation menu that allows users to navigate between different sections of your website.
 - Common sections might include Home, About, Portfolio, Contact, etc.
 - Use an unordered list (`<ul>`) with list items (`<li>`) to structure the menu.

3. Main Content:
 - Include some text content about yourself or the purpose of the website.
 - You can include sections like About Me, Skills, Services, Projects, etc.
 - Use headings (`<h1>`, `<h2>`, etc.) and paragraphs (`<p>`) to structure the content.
 - Use images

4. Footer:
 - Add a footer section at the bottom of the webpage.
 - Include contact information, such as an email address or social media links.
 - You can also include copyright information or a disclaimer.

5. Basic Styling with CSS:
 - Use CSS to style the web page layout.
 - Set different background colors for the header, footer, and main content sections.
 - Experiment with different fonts and font sizes for the text.
 - Apply margins and padding to create spacing between elements.
 - Use CSS to style the navigation menu, such as changing the color and adding hover effects.
 - Ensure the webpage is responsive by using CSS media queries to adjust the layout for different screen sizes.

6. Optional Enhancements:
 - Add images or icons to enhance the visual appeal.
 - Use CSS to create visual effects like gradients, shadows, or rounded corners.
 - Consider using Google Fonts or other web fonts to customize the typography further.
 - Implement a responsive design to ensure your website looks good on mobile devices.
